TOURISM IN INDIA: A GROWING GLOBAL ATTRACTION

BY AAYESHA SIDDIQUE MOMIN, (10M)

Tourism is one of the most popular and growing industry of the world, which not only helps a country grow economically but also creates employment for all kinds of people in the country, i.e. it does not require any sort of education qualifications.

India is blessed with wonderful physical features. It is bounded by Himalayan Mountains on the north, has a desert known as “Thar” desert in the west, has two islands, the “Andaman and Nicobar Islands” and the “Lakshadweep” Islands. It also has plateaus and coastal plains. These relief are not the only reason why people visit India, but the people of India are also very welcoming.

India and Indians are very beguiling and also has many diversities in religion, festivals, food etc, which attracts tourists from all over the world.

India, the country of wonders and beauty also has many historical monuments which leave the tourists in great horror and inspiration. Taj Mahal, India Gate, Gateway of India are some monuments visited by many tourists not only around the globe but also the people of India.

Earlier, people used to view India as a poor country but with the rise of social media, people visiting India have also increased. When, someone scrolls about India on social media, they mostly see people from the US or even their own country visiting India and praising this beautiful land, its people, food, places and even the weather conditions, which inspires them to visit this heavenly land.

Tourists enjoy visiting India and are always fascinated about its beauty; bathing with a bucket and a mug; and how friendly , lively and helping people are to them as well as to each other.

As healthcare facilities are improving, people around the globe are visiting here more and more. This new aspect is given the name ‘Medical Tourism’. The country has earned around 320 million dollars from up to 1 lakh tourists visiting India for medical tourism. They believe and it is also scientifically proven that nature and environment can heal more efficiently than being confined in a room. Tourists visiting for medical facilities are often given treatment in the nature. India, a beguiling land is also very famous for ‘Heaven on Earth’, which is Jammu and Kashmir. Tourists visiting India are treated very heart warmingly.

To sum up, as tourists are visiting this land and according to their reviews, the growing Global attraction of tourism in India has resulted in people coming together even more, decreasing unemployment, learn more about nature as well as getting a sense of loving and heart-warming human nature which they can find only in “Incredible India”.

FIRST PRIZE , CLASS 10

IGNITED MINDS INSPIRE OTHERS

Aastha Rathore - 9M

An ignited mind is not simply the one with knowledge, but also the one with passion, curiosity and dreams. The phrase "ignited minds inspire others" refers how an individual can have a profound effect around him. The quote which encapsulates the essence of ignited minds is by Steve Jobs: "The people who are crazy enough to think they can change the world are usually the ones who do."

This quote highlights how an ignited mind, driven by their dreams and unwavering belief in their abilities, has the power to inspire others and change the world.

An ignited mind is the force of positive change in the world. It thrives on exploration and experimentation, constantly seeking new ways to push the boundaries of what is possible. It is not satisfied with simply accepting the norms, but tries to challenge and break it. People with ignited minds have a remarkable ability to inspire others with their creative ideas. They don't keep their passion bottled up. They share their excitement through their actions, words and overall energy. They believe that nothing is impossible. They see the world not as it is, but as it could be.

There are numerous people in India's history whose ignited mind continued to inspire generations such as Mahatma Gandhi and Dr. APJ Abdul Kalam.

Mahatma Gandhi demonstrated how an ignited mind can inspire others to change the world. His idea of Satyagraha, Non-violence etc inspired people to resist oppression in peaceful ways. His famous words are- 'Be the change that you wish to see in the world.' Dr. APJ Abdul Kalam inspired the youth of India to dream big and achieve it through hard work.

In conclusion, remarkable aspect of ignited mind is to inspire their passion, courage and dreams. They inspire others to join them in their quest to change the world in a better way.

'The flames of ignited mind not only lights the way for oneself but also ignites the way for others around them.'

Sharing is Caring

GRANTH ABHINAY JAIN 8 N

The concept of 'sharing is caring' encompasses the idea of Selflessness, empathy and compassion. Sharing is caring means, if you share, you actually care for someone. The act of caring is very powerful because it creates deeper bonds as an individual. When we share things that we have to others, we showcase a sense of humility and empathy. Sharing extends kinship bonds. When we share, we break the boundaries of our ego and recognize the humanity of the other. Sharing breeds inter-dependence, happiness and harmony. The simple phrase 'sharing is caring' speaks in volume and illustrates a trait that everyone can understand and seems pleasing to all. In the society sharing things is termed as 'charity' but it is much more than that.

Being able to share is being able to understand the situation others are in. Sometimes sharing is termed as merely generosity but it has a much deeper meaning. Sharing is cultivating a mutual relationship. Sharing cultivates gratitude and fulfillment both for the giver and the receiver. The act of giving brings you joy and satisfaction, while receiving brings satisfaction and belonging. In the culture of being driven through materialism and competition, the act of sharing reminds us of human connection. In essence, sharing is not just an expression, it is a fundamental building block of compassionate and caring society. By embracing the virtue of sharing, we can create a world where empathy, generosity thrive enriching the lives of all who inhabit it.

By embracing the principle of sharing, we not only uplift others but also enrich our own lives with gratitude and fulfillment. The simple act of sharing serves as a powerful reminder of our shared humanity and the importance of generosity. So let's embrace the timeless wisdom: sharing is not just an act, it's a reflection of our humanity. In conclusion let's continue to share for in doing so, nurture the world where caring knows no bounds. So, sharing thing is the same as caring. It is a good phrase that everyone should follow and implement in their lives.

FIRST PRIZE- CLASS 8

Progress is where Science is !

Krutika Rathore 7N

Today's era is the era of science. When we look around ourselves, the world appears to be full of miracles of science. Its contributions has improved the human life, making tasks once deemed to be impossible now can be achieved with ease. No field is untouched by it. Every moment in one's daily routine, from beginning of the day to sleeping at night, is influenced by science.

One quote which perfectly describes the relation between science and progress by Stephen Hawking is

“The essence of science is progress. Without it, we are just treading water.” This is true because science constantly pushes the boundaries of what we know and open the door to new possibilities.

The development of a country can be measured by how much is the advancement of its science. Science is the backbone of a foundation and plays a crucial role in the development of a country. Let's consider the field of medicine. When the world was facing a pandemic like Covid19, which posed a threat to the human life, only science saved the world, otherwise the world was on the verge of human extinction. Whether it is the problem of food crisis due to increasing population, fuel crisis, the discovery of renewable sources of energy, science has solved all these problems.

Human civilization has developed because of science. Otherwise, the humans would have been like other creature. In conclusion, science is all around us, shaping the world. Whether it is through technological advancements, groundbreaking discoveries etc science is solving global challenges. Science is the progress that continues to drive humanity to the world of exploration.

FIRST PRIZE-CLASS 7

One Earth, One Family, Save Earth

PRAVAR M NAIK-6M

We all reside in the same blue planet. The earth isn't just an average chunk of rock; it's a living, breathing planet. Our rivers, mountains, forests and every speck of sand are interconnected to form the complex web of life. However, the status of our planet isn't currently good. Challenges like air and water pollution, global warming, deforestation and other environmental crisis threaten the balance and the health of Earth.

Adopting environmental – friendly options and reducing our dependency on non – renewable sources is a start. Prioritizing reduction in consumption, reusing whatever we can and recycling wherever possible can significantly cut down our waste generation. Industrial sectors, a major contributor to global warming and air pollution should look for sustainable practices.

Equally vital is educating the younger generation about Earth's challenges. Schools and Junior Collages should conduct environment – centric activities such as essay writing, discussion, tree planting and should conduct events like world environment day on 22nd April. In order to safeguard the existence of humans, we should protect and take care of our planet.

The pollution caused by humans is polluting the planet so rapidly, that it's threatening our survival. For example, air pollution and due to which global warming. Global warming has caused a rise in the global temperature so much that A.C.s' have started to appear in almost every house. Moreover, many birds and animals are going extinct and the world is slowly approaching to an end.

No matter how small of an effort we make, it still counts in saving the Earth. By working together, we can make a huge difference. As the most advanced and matured creatures of the planet, we should understand that the earth is the only planet to support life.

FIRST PRIZE-CLASS 6

National Sports Day

-SAKSHI YADAV 10 N

National Sports Day is celebrated every year in India to honor the legendary hockey player Major Dhyan Chand ji. This day is celebrated to reminisce about his great sportsmanship and spirit. He was a great sportsman and was devoted to hockey, giving him the title of 'Wizard of Hockey'.

Major Dhyan Chand ji was born on 29th August 1905, the day we now celebrate as National Sports Day. He has won several gold medals for India during his prime in the late 30s and 40s. His contribution in the Olympics has been a matter of pride and glory for our country. His devotion to his country, his patriotic sentiment is something worth being remembered.

The celebration of National Sports Day holds great significance in our lives, although it is reduced to being a celebration of one certain day of the year.

There is a lot to learn from Major Dhyan Chand Ji itself which should be applied in our daily lives too.

He was a great personality who, with his great talent and refined skill, represented India 2 passionately. He had chosen not to play for another country when offered otherwise all due to his devotion to the nation and his determination to serve the country. This tells us that no matter how successful one becomes, one should not abandon its roots where they nurtured themselves and worked towards their success.

Major Dhyan Chand Ji will always be a big inspiration for all the young enthusiasts of our country. He was an extremely skilled person, which he earned through his hand work.

This proves how being talented or not talented doesn't matter, refining your skill and putting in the right amount of handwork always leads to improvement and may lead to success, positively.

What he would really want us to do for honoring him would be to recognise our own talents and skills, hone them. He would not want us to suppress the budding talents like it is being done nowadays.

Even in a country where the craze of sports is enormous, this issue of talents and skills being suppressed still prevails. We need to overcome this stigma and adopt the wise principles of Major Dhyan Chand Ji as a real tribute to him.

In conclusion, the celebration of National Sports Day should oversee some great wisdom and principles being shared to all in the country

What really matters is how we utilise everything we know about Dhyan chand ji in our own lives and what we learn from it.

That, is the real tribute he deserves from us on National Sports Day.

NATIONAL SPORTS DAY

-GAYATRI NANDLAL DUSANE 10 M

National Sports Day, observed on 29 August each year in India is dedicated to promoting sports and physical fitness across the country. This day commemorates the birth anniversary of Major Dhyan Chand, a legendary Hockey player whose extraordinary skills and sportsmanship earned him international acclaim and brought glory to Indian sports. He is also known as ‘Wizard of Hockey’. It is said that when Dhyan Chand’s hockey stick hit the ball, it was as good as to be a goal.

The importance of National Sports Day lies not just remembering a great athlete but in encouraging a culture of fitness and sportsmanship among people of all ages. Major Dhyan Chand’s contributions to Hockey, where he led India to three Olympic gold medals, which serves as an inspiring example of dedication and excellence. His achievements are testament to the power of perseverance and hard work, qualities that are essential for success in any field.

On this day various events are organized to highlight the importance of physical exercise and to engage people in sports. Schools, colleges and sports club host competitions, workshops and awareness programs to inspire the students and young athletes. The day often features demonstrations of different sports, training sessions and motivational talks by prominent sports figures. These activities aim to foster spirit of sportsmanship, teamwork and discipline which are crucial in both sports and everyday life.

National Sports also serves as a platform to recognize and honor outstanding sports personalities who have made significant contributions to Indian sports.

Furthermore, this day underscores the need for inclusivity in sports. It also aims on physical fitness in everyone’s life irrespective of age.

Lack of physical fitness can lead to health problems. One of the major problems caused is obesity. Laziness in doing work is because of no exercise. Yoga and meditation is also equally important as it helps in sound mind and also calm and concentration increases. As they say, “Sound mind in Sound Body”.

In conclusion, National Sports Day is more than just a commemoration of a sport legend; it is a celebration of values and benefits of sports. It reminds us of the importance of maintaining an active lifestyle and the role of sports in promoting unity, discipline and national pride.
